

Classic America

Wi-Fi App Installation and Instruction Manual for Mini Split Air Conditioners with Heat Pump.

The information provided in this manual applies to all Classic America Mini Splits with Wi-fi function. Please read through the manual carefully.

Let's get started!

Operation guideline. Please take below simple guideline instruction as a quick reference.

Operation Steps	First Time App Installation	Re-installing APP (Previously registered)
Step 1	Download and Install APP	YES
Step 2	Activate APP	YES
Step 3	Registration Account	NO
Step 4	Login	YES
Step 5	Add Device to control	Previously Registered Device (s) will appear.

Note: If you registered the account and added one or more devices before, when you re-install the APP and login, the previously added device or devices will reappear

FCC Caution (FCC ID: 2ANDL-WBR3/2ANDL-TCWBRCU1/2ANDL-WBR1)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- The distance between user and device should be no less than 20cm.

Wi-Fi Module specification and basic information

1. Minimum specifications on a Smart phone:

Android 6.0 version or higher

IOS 11.0 version or higher

2. Basic parameters for Wi-Fi module

Parameters	Details
Network frequency	FCC:2.412-2.462GHz,CE:2.412-2.472GHz
Standards of WLAN	IEEE 802.11 b/g/n(channels 1-14)
Protocol stack support	IPv4/IPv6/TCP/UDP/HTTPS/TLS/MulticastDNS
Security support	WEP/WPA/WPA2/AES128
Network type support	STA/AP/STA+AP
Bluetooth Frequency Range(Optional)	2.402-2.480GHz
Bluetooth RF Conducted Power(Optional)	6.5dBm

Download and Install the App

SmartLife-SmartHome

For Android smart phone

Method1: Please scan the QR code with a browser scanner, download and install the APP.

Method2: Open the Google "Play Store" on your smart phone and search "SmartLife-SmartHome" , download and install the APP.

For IOS smart phone

Method1: Please scan the QR code and follow the tips to get into "App Store", download and install the APP.

Method2: Open the Apple "App Store" on your smart phone and search "SmartLife-SmartHome" , download and install the APP.

Note:

Please enable the permissions of Storage/Location/Camera for this APP when installing. Otherwise it will have some problems when operating.

Activate APP

The first time the app is used, it will need to be activated.

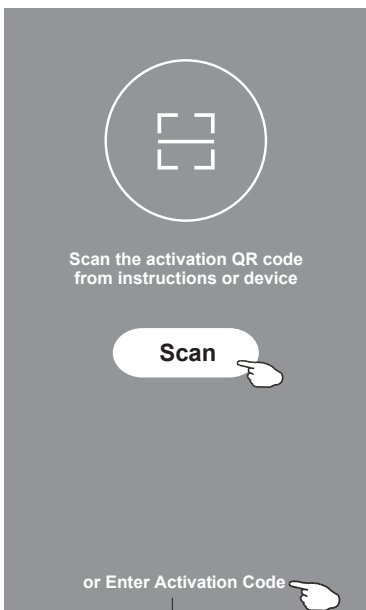

1. Launch the APP "SmartLife-SmartHome" on your smart phone.

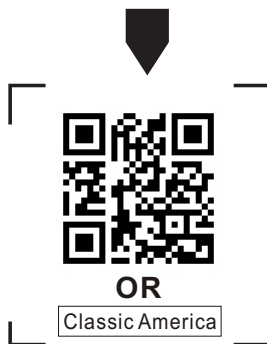

SmartLife-SmartHome

2. Method1: Tap button "Scan" and scan the Activation QR code below

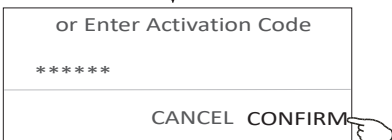

Method2: Tap "or Enter Activation Code" on bottom of the screen, then enter the activation code and tap "CONFIRM".

Activation QR code and activation code

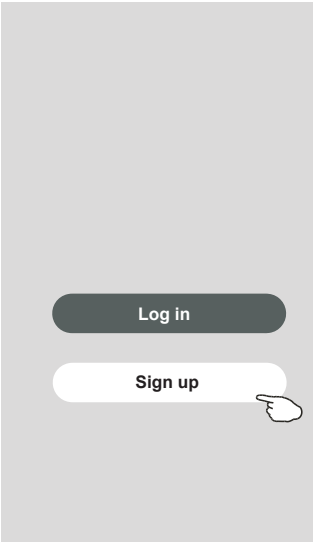

Note: Without the QR code or activation code, you cannot activate the APP and use it . Please keep these in a safe place

Registration

1.If you don't have an account please tap the "Sign up" button.

- 2.Tap">" and choose the country.
- 3.Enter your e-mail address.
- 4.Tap the button "Get verification code".
- 5.Enter the verification code you received from e-mail.

A screenshot of a 'Register' form. At the top, there is a back arrow and the title 'Register'. Below the title, there are two input fields: 'Country' with a right-pointing chevron and 'Mobile Number/Email'. Below these fields, there is a checkbox with the text 'I Agree Privacy Policy and User Agreement'. At the bottom, there is a dark grey button with the text 'Get verification code'. A hand icon is pointing at the button.

enter your e-mail address here

Search the country or slide the screen up/down to find and choose the Country.

A screenshot of a 'Country Chosen' screen. At the top, there is a back arrow and the title 'Country Chosen'. Below the title, there is a search bar. Below the search bar, there is a list of countries starting with 'A': Afghanistan, Albania, Algeria, Angola, Argentina, Armenia, and Australia. To the right of the list, there is a vertical scroll bar with letters A through Z. A hand icon is pointing at the list.

Registration

- 6. Create a password with 6-20 characters including characters and numbers.
- 7. Tap "Done".

Login

If you forgot the password or you want to reset the password, proceed as below:

1. Tap "Forgot password".
2. Enter your account(e-mail address) and tap button "Get verification code".
3. Enter the verification code received by your e-mail.
4. Set the new password and tap "Done" button.

Add device

You can then turn on the air conditioner and reset the Wi-Fi module using the remote control by following one of these steps:

Method 1: Press the **DISPLAY** button 6 times in 8 seconds , then you will hear 2 beeps and AP will appear on the indoor display.

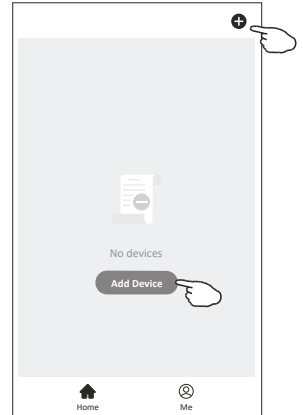

Method 2: Press the **ECO** button 6 times in 8 seconds , then you will hear 2 beeps and AP will appear on the indoor display.

Method 3: Long press **Mode** and **^** together over 3 seconds , then you will hear 2 beeps and AP will appear on the indoor display.

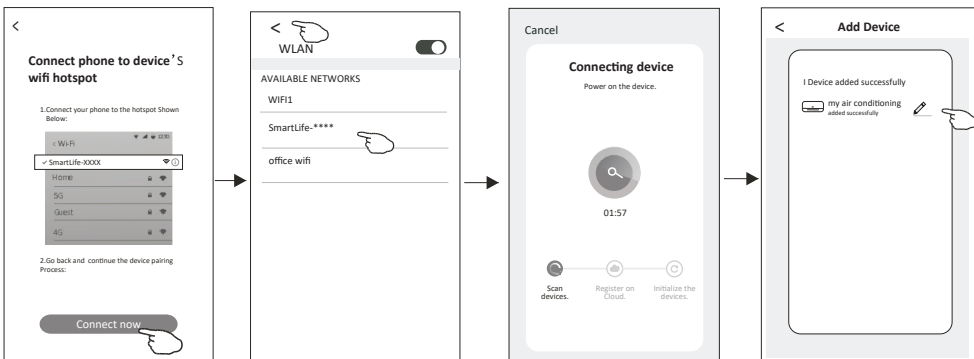

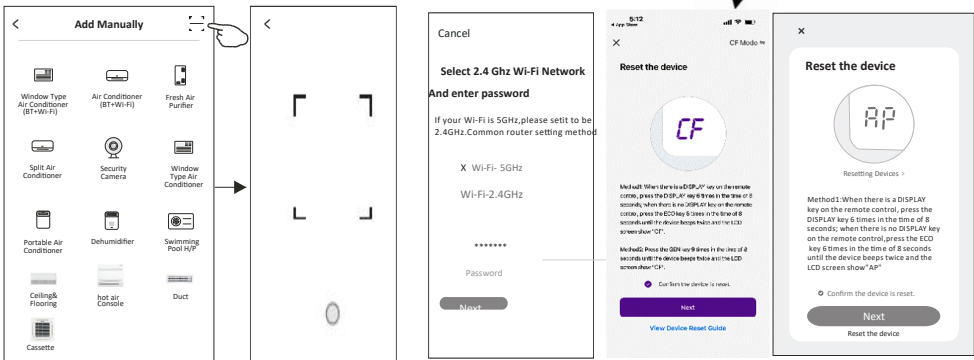

Add device

1-Add device through scan QR code

1. Apply power to the unit, but no need to turn on the air conditioner.
2. Click "+" in the upper right corner of the "Home" screen or tap "Add device" on a room which has no devices.
3. Scan the Activation QR code on the manual or on the unit
4. Input the password of the Wi-Fi router to which your smart phone is connected, then tap "Next".
5. Add device.
6. Read the instruction carefully and tap "Connect now".
7. In the network setting screen, select "SmartLife-****", and tap "<".
8. You can see the percent rate of the connection process, and "PP", "SA", "AP" will appear on the indoor display.
 - "PP" means "Searching for the router"
 - "SA" means "Connected to the router"
 - "AP" means "Connected to the server"

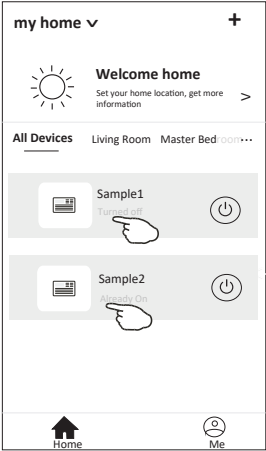

IF THIS SCREEN POPS UP, SELECT 'AP' BY CLICKING ON THE TOP RIGHT

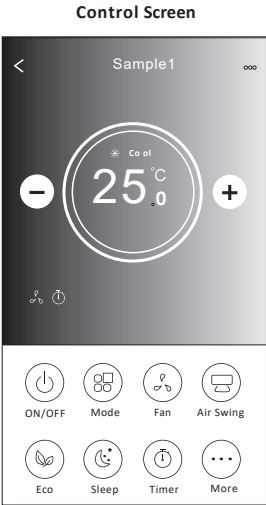

Air conditioner control

The device control screen will pop up automatically after adding the device the first time. Or, next time, you can bring it up manually by tapping the device name on the home screen.

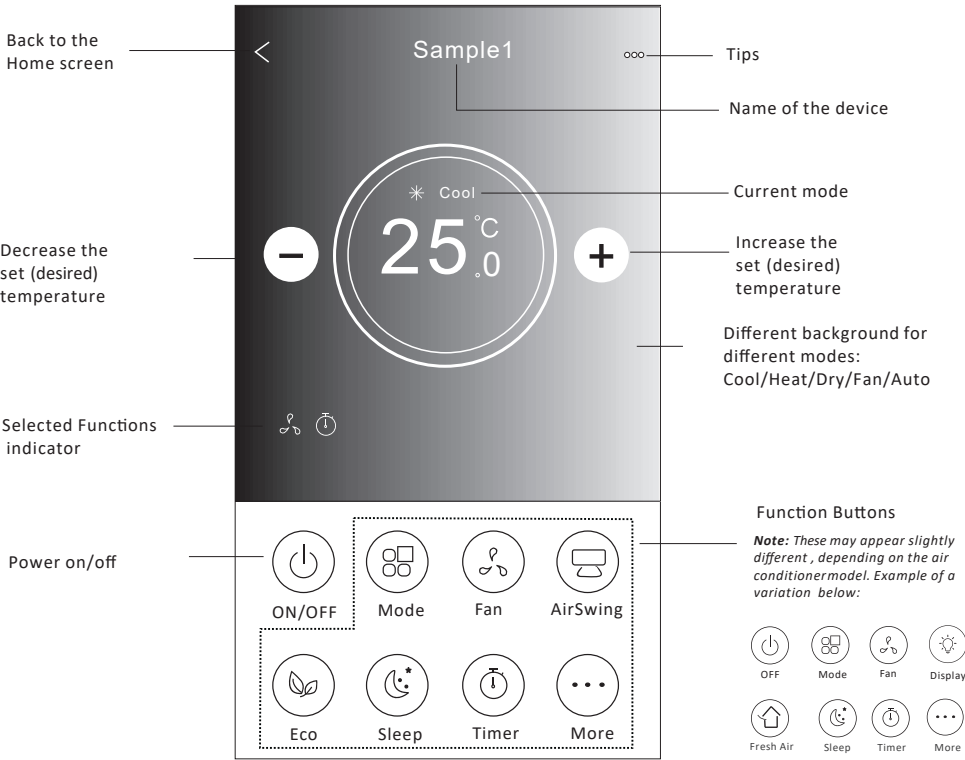

This is your main control screen

Air conditioner control

Control Screen Detail

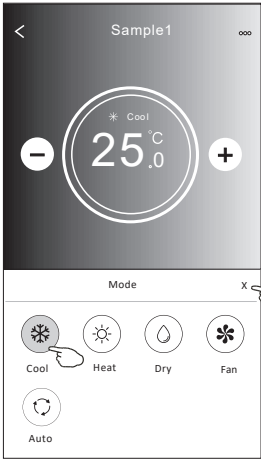

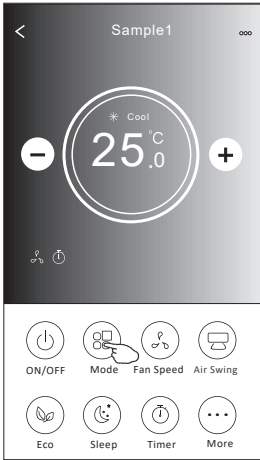

The main control interface

Air conditioner control

-Mode selection

2.Account and security

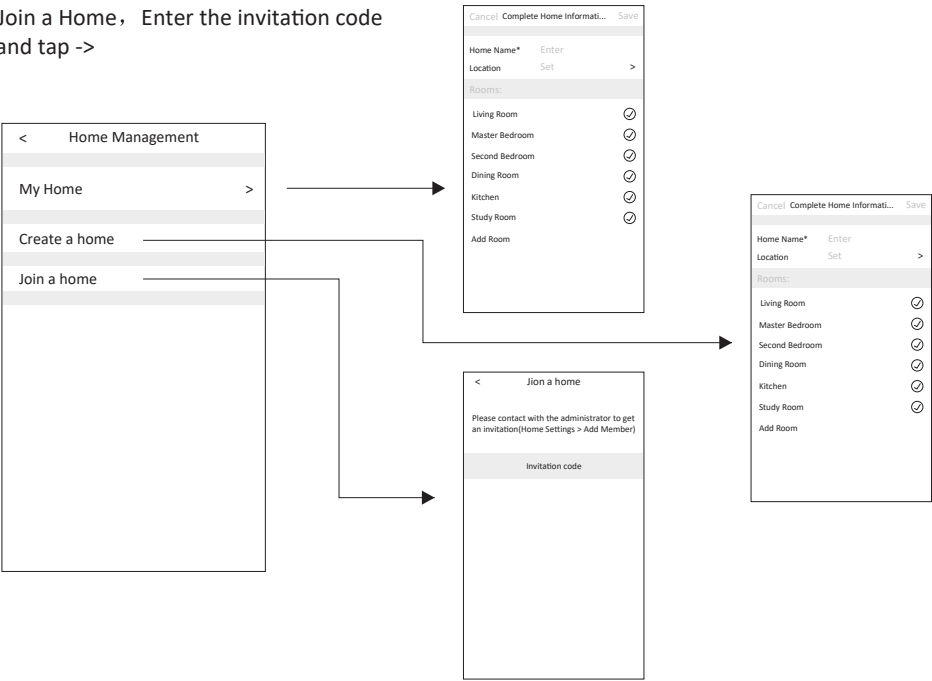

Notice

Home(Family) management

1. Tap “ Home Management ”

2. Enter the Home Name, set your location and specify the rooms by choosing the recommended room like “Living Room” or tapping “Add Room”
- 3.Create a Home
- 4.Join a Home, Enter the invitation code and tap ->

Notice

1. Due to frequent technical updates, there may be deviations of the current items from what is on the manual. We express our apologies. Please refer to your current product and APP.
2. The Smart air conditioner APP can be altered without notice for quality improvements and also be deleted depending on the circumstances of manufacturing firms .
3. In the case the Wi-Fi signal strength is weak, the smart App may disconnect. So make sure the indoor unit is near to the wireless router.
4. DHCP server function should be activated for the wireless router.
5. The internet connection may fail because of a firewall problem. In this case, contact your internet service provider.
6. For smart phone system security and network setting, make sure the Smart air conditioner APP is trusted.

Troubleshooting

Description	Analysis of cause
Air conditioner can't be configured successfully	1. Check that the mobile connected WLAN router SSID and password is correct; 2. Check whether there are additional settings of WLAN router as shown below. 1) Firewall by router itself or by PC 2) MAC address filtering 3) Hidden SSID 4) DHCP server Reboot WLAN router, mobile device and air conditioner (WLAN module) and pair the air conditioner again. Before rebooting, check nobody has already connected to the same air conditioner.
Mobile can't control air conditioner	1. When air conditioner (WLAN module) is rebooted and app displays Device remove?, ignoring this confirmation will lead to mobile device losing control permission for the air conditioner. You will need to pair the air conditioner again. 2. In case of a power failure, the mobile device will lose control permission of air conditioner for 3 minutes after power is restored (Notification will not show up on the mobile device.) If you cannot control the app (air conditioner) even after power is restored, you will need to pair the air conditioner again.
Mobile can't find air conditioner	1. App displays Air conditioner Device offline. Please check the following conditions. 1)The air conditioner has been reconfigured. 2)Air conditioner has no power. 3)Router has no power. 4)Air conditioner can't connect to router. 5)Air conditioner can't connect to network through the router. 6)Mobile device can't connect to network. 2. After adding the device, it disappears from the device list . Hold and slide down to refresh the device list. If no change, shut down the app and start again.
